**Development of non-uniform HVDC line protection algorithm using the wave method.**

In this article sending end voltage changing of cable-air line is investigated in event of fault on cable section and air section of line. Line protection algorithm development basic principles are offered.

*Key words: wave method, cable-air line HVDC, line protection.*

*Kapitula Yulia Vladimirovna*, Researcher of Department HVDC Transmission Technology of the Scientific and Technical Center of Unified Power System (STC UPS).
