Application of controllable reactive power compensation devices for Smart Grid implementation in the UPS of Russia.

An article presents an overview of nodes in the UPS of Russia appropriate for installation of reactive power compensation devices in order to increase transfer capacity and controllability of the power grid.

Key words: power system, reactive power compensation devices, control, regulation, transit, overhead line.

Vinogradov Andrey Yurievich, Senior Researcher of Department Electric Power Systems of the Scientific and Technical Center of Unified Power System (STC UPS).
